## TCD are approved suppliers for **Johnson Controls Air Conditioning Service Equipment**

- including the market-leading, fully-automatic, database controlled X8GB complete with printer - arguably the easiest machine in the market to operate, ideal for fast-fits, garages and bodyshops; the X4GB semi-automatic "price fighter"; and the X6GB with massive 200 litres per minute vacuum pump and internal 30 kilo tank suitable for CV, PSV, agricultural and plant. TCD also distribute the full range of Fluke oscilloscopes; Pomana automotive test leads and probes; and Bosch KTS650 and KTS520 diagnostics

## **AirCon Service Stations**

## UNIVERSAL CAN (HI) CAN (LO) TESTER

The **CVX200** allows quick and complete monitoring of specifically Peugeot and Citroën vehicles fitted with VAN systems and universal testing of CAN high speed, CAN fault tolerant (low speed) multiplexed networks.

- Checks that there is no physical problem on the bus:  
**Static test** (power off)
- Checks that network communication is correct:  
**Dynamic test** (power on)
- Direct interpretation of measurement. Open circuit, short to ground or short to other Can circuit identified, results and faults displayed with LEDs.
